

## **Cage-free eggs policy**

Associated British Foods is a diversified, ingredients and retail business and whilst only some of our businesses purchase eggs, of which a percentage are already sourced from cage-free hens, we are committed to increasing this volume. We will continue to listen to our customers and supply information about the different egg types we offer. We are committed to sourcing 100% cage-free eggs for our UK grocery brands by 2025. We are also looking at our operations outside the UK and will look to make progressive steps to address these geographies.
